Specialist Divisions MEP Division

Dubai Civil Engineering (DCE) has been on the forefront of the construction industry since 1985 and has the capability to carry out Design, Execution and Maintenance of both conventional & turnkey construction projects. One of our outstanding features is our flexibility and adaptability to the fast changing market requirements. The Management has successfully introduced innovative technologies to the industry with its ability to foresee market trends. DCE has its own Design Department as well as Specialist Construction Divisions, which involve the Design, Development & Execution of the latest construction technologies. Dubai Civil Engineering has established an internal MEP and Structural Division Departments which enables the control of all aspects of the construction process.

Our MEP Department is an integration of Mechanical, Electrical and Plumbing Department that provides comprehensive services commencing from Design, Installation to Commissioning. Pioneering in its own league, the department provides cost-effective and innovative solutions and products for projects such as Hospitals, Newsrooms, Commercial & Residential Buildings, Auditoriums, Schools, Industrial projects, Hotels & Leisure Amenities, etc.

Dubai Civil Engineering's In-house MEP Department is managed by the MEP Director and supported by the MEP Deputy Director. It includes various Divisions such as Mep Design, Estimation, Execution, Maintenance, Quality Control, Testing & Commissioning, HVAC, Plumbing, Structural Cabling and Electrical Departments. The functions of various MEP Divisions are outlined below:

MEP Design Team operates under the MEP Design Manager with HVAC, Electrical and Plumbing Design Engineers, Structural Cabling Engineers, Estimation Engineers, Draftsman and Quantity Surveyors. Designs which obligate the scope of Dubai Civil Engineering will be executed in-house to meet the conceptual requirements of the clients with appropriate number of proposals. All the design stages will be executed as per the agreement with the client, i.e. Design Review, Verification and Validation. Upon the completion of the proposal, it shall be forwarded to the consultant for final review and approval. The shop drawings will be prepared only after the completion and approval of Design, shop drawings for Mep will be issued from the Design Department to the site and registered in the output drawing, thus forwarded to the consultant for approval using submittal form. Our experts at site shall be maintaining workshop drawings schedule register as well as contract drawing register to keep track of the drawings.

MEP DIVISION TIME LINE

Specialist Divisions MEP Division

The execution of MEP services is carried out by Five of our Project Managers. Each MEP Project Manager is assigned a project in nearby locations for less travel distance to ease communication and transportation of our manpower resources, tools and machineries. Each Project Manager will consist of the following subordinates: HVAC, Electrical & Plumbing Engineers, Foremen, Draftsmen, Gangers, Technicians, Store keepers, Helpers, etc.

Moreover, each projects has its own HVAC, Electrical and Plumbing Engineers with supervisory workforce provided from the above pool of resources. If there is a need for recruiting additional workforce it will be provided upon demand taken from other completed projects through the approval of the management.

The site co-ordination drawings as well as As Built drawing are prepared by the site draftsmen whereas, the concept design and shop drawings are constructed in our DCE Head office. Furthermore, as far as the bigger projects are concerned the shop drawings may be assessed by the site draftsman to monitor time management and accuracy. Submission of drawings, Method Statement, Material Submittal, Inspection Request etc made to Consultants shall be carried out at site by representatives of the Main Contractor's Engineers.

A Quality Control Team shall be nominated for each project to monitor the quality control under Dubai Civil Engineering Quality Policy under the guidance of our quality engineers and corrective measures shall be carried through if any situations occur with the respective site engineer of that specific project. The same information shall be communicated to the MEP Director. The Quality engineer shall monitor all processes through Dubai Civil Engineering's Quality Manual for the following stages of the design process:

Design and Development

The company has established and maintains a procedure to ensure that design activities are completed and verified in accordance with the contract requirements.

Design and development planning:

Design plan will be established identifying the responsibility for each design and development activity. Design plan will be updated as the design evolves. The design and verification activities are assigned to qualified personnel equipped with adequate resources. Design plan will define organisational and technical interfaces between different groups involved in the design process.

Design and development input:

Design input will be identified, reviewed for adequacy and documented in the plan. Incomplete or conflicting requirements will be resolved by delegated design personnel.

Specialist Divisions

MEP Division

The input shall include:

- Functional and Performance requirements
- Applicable Statutory and regulatory requirements
- Information derived from previous similar design, if any.

Design & Development Outputs:

Design output shall be expressed in terms of requirements, calculations and analysis and identified in the design plan. Design output shall meet design input requirements, make reference to acceptance criteria, comply with statutory requirements and refer to those characteristics that are crucial to the safe and proper functioning of the product.

Design and development review:

Design review will be performed as indicated on the plan in order to:

Evaluate the ability of the results of design and development to meet requirements.
Identify any problems and propose necessary actions.

The results of review shall be documented.

Design and development verification:

Design verification will be performed by competent personnel in accordance with the plan and documented. Verification shall ensure that design output met design input requirements. Method of verification is specified in the design procedure.

Design and development validation:

Design validation is performed to ensure that the product conforms and fulfils the defined user needs and specified design requirements under specified operating conditions. Results of design validation will be recorded.

Control of design and development Changes:

Design changes or modification to the approved design shall be identified, documented, reviewed, verified, approved and validated prior to implementation. The review of changes shall include evaluation of the effect of the changes on the product.

Specialist Divisions MEP Division

Dubai Civil Engineering's MEP Workshop provides fabricated ducts, supporting frames, supporting structures and any necessary enhancements required at site as temporary or permanent as part of the MEP services. Our MEP Workshop functions under one of our Fabrication Foreman who ensure all process on site is made as swiftly as possible bounding the objectives of the client requirements.

MEP Workshop

(A) A/C Ducting Workshop

Pre-insulated Ducting shall be proposed to expedite the Ducting work and shall be fabricated at site workshop further transported to the required level. Riser Ducting shall be G.I. and will be fabricated by CNC Machines at our Al Hamad Industrial Workshop. The Workshop is equipped with machines such as Duct-O-Machine, PLSMA Cutter Machine, PITTS-BERGE Machine, TDC Machine, Rolling Machine, Shearing Machine, Whisper Lock, Corner Claddy, Lock Former Machine, Flange Machine, Press Brake, S.cleat, Small Rolling Machine, Spot Welding Machine, Bench Drill Machine, Grinder Machine and Band Saw Machine.

(B) Valve Package Workshop

All FCUs Valve Packages shall be standardized to expedite the piping work and will be assembled in the Workshop.

(C) Chilled Water Piping Workshop

Activities such as Cutting, Painting, Grooving & Threading are fabricated for standard length of pipes.

(D) Plumbing Workshop

Standard assemblies for Water Supply and Drainage are done.

(E) Testing & Commissioning Workshop

All major Equipment of MEP Works such as AHUs, FCUs, Fans, Pumps, MDB, SMBD & DB shall be inspected before any installation commences at site to insure quality policy is adapted and avoid re-work and replacement.

(F) Electrical Workshop

Fabrication of supports, standard sub assemblies for trunking, switch boards, etc shall be done.
